Venkatesh R

has successfully completed the online Specialization

Building AI Agents and Agentic Workflows

The certificate holder has gained practical expertise in designing agentic AI systems using modern frameworks and workflow patterns. Through hands-on labs and projects, they built LangGraph agents supporting memory, iteration, conditional logic, and Agentic RAG, developed self-improving AI agents, designed multi-agent systems with orchestration, and structured modular workflows using CrewAI. They also applied frameworks like IBM BxEL and AG2 (AutoGen) to conversation-driven applications and scalable workflows, configuring agents, tasks, memory, and tools to enable reasoning, feedback loops, and autonomous behavior.

Venkatesh R

has successfully completed the online Specialization

Modern and Contemporary Art and Design

Congratulations! You have completed all three courses of Modern and Contemporary Art and Design, a Specialization from The Museum of Modern Art. Through this Specialization, you have developed a deeper understanding of artists' materials, processes, and strategies for responding to the social and cultural issues of their time. You have gained skills in close-looking and critical thinking about modern and contemporary art and design.
